<ul style="list-style-type: none"> • Introduction <ul style="list-style-type: none"> - Maternal love : desire - excessive love -> strict disciplines - Opinion : agree • Body <ol style="list-style-type: none"> 1. more educated people <ul style="list-style-type: none"> - aware : discipline isn't always good way - happiness and freedom more important 2. technology <ul style="list-style-type: none"> - educational programs - ex : educational animations -> stimulate curiosity, morals 3. burdens to the children <ul style="list-style-type: none"> - that they are born near pandemic - worried about difficulties that children should deal with • Conclusion

3. Essay Writing

Maternal love, an instinctive desire of parents towards the safety and success of their offsprings, has been revealed in a number of different forms of home education. They are usually sorted in two representative types : education focused on strict regulations and tolerance. Some people claim that exorbitant amount of love toward the offspring results in the prevalence of the strict way of education, since mother's love can't be confined in certain amount according to the common sense. In my opinion, though, the permissive way of education prevails in the modern days for several reasons : higher rate of educated people, assistance of technology, and responsibility for burdens to their children.

First and foremost, increased rate of people have received a high quality of education in the modern days compared to the past. This means that more people are informed of the significance of respecting the freedom and guaranteeing the happiness of the children. Since disciplines and strict punishments hinders young children from gaining happy emotions and good memories, educated parents are likely to seek for more effective, and less violent alternative. This turns out to be an attitude full of tolerance and perseverance.

Second of all, advancement of the technology has recently enabled people to access to a number of online educational programs, making strict disciplines for home education unnecessary. Professionals engaging in child psychology and even AIs forms the curriculum with essential skills that children in certain range of ages must acquire, also adding stimulative factors helpful for accelerating the studying process. For instance, educational animations provides both the hilarious factors fun enough to incite the children's curiosity and morals that etches right outlook to the children's mind. Parents don't feel the necessity to behave strictly to children since they believe that the educational programs are appropriate substitutes.

In addition, it has become inevitable for the parent generation to possess uneasy and pitiful emotions toward the child generation for burdening hardship of the Covid-19 pandemic. They are concerned about negative effects and other hazards that their offspring must deal with in the present and future period. The sympathy and pitifulness toward the children pacifies the parents' strict disciplines.

In conclusion, peaceful and optimistic way of home education has become a fashion in the modern days thanks to the education, technology, and responsibility for burdens.

4. Speaking

In my opinion, most people prefer permissive educational methods for 2 reasons.

First and foremost, higher education rate plays roles in this current. This means more people aware that freedom and happiness are important for the children's growth. In contrast, disciplines violate these qualities, making parents seek for other better alternatives.

Second of all, technology permitted people access to educational programs. For instance, educational animations both contain factors that stimulate curiosity, and morals. The effectiveness of the programs in educating makes strict behavior unnecessary.
